

**Where to find guidance regarding COVID-19 restrictions, requirements and recommendations:**

**Local Activities (single club or center)** must follow the applicable local and state requirements and recommendations.

**\*Regional or Interclub/center Activity (individuals representing more than one club and/or center)** must follow the most stringent local and state requirements and recommendations from among the individual clubs/centers represented. In other words, if a region has clubs in two states and one state requires mask wearing while the other does not, the Pony Club activity must follow the mask wearing restrictions, even if that activity takes place in the state that does not require them.

**National or Inter-regional Activity (individuals representing more than one region or more than one club and/or center from different regions)** must follow the published USPC guidelines for rallying and national testing during COVID.

**\*applies only to Regional or Interclub/center Activities which do not have other specific guidelines or requirements, such as rallies**
